Ukrainian – Native

English – Advanced

PROFILE

Whenever I am working with data, my goal lies above creating a simple description of it - I familiarise myself with the topic of the dataset to expand my vision, and, combined with practical knowledge and skills, strive to see the past of the event, hidden in a dataset, its future development, based entirely on derived facts and, most importantly, decide the most beneficial course of action.

SKILLS

HARD SKILLS

Python

SQL

Google Sheets

HTML/CSS

C/C++/Swift

TOOLS

PostgreSQL

MySQL

BigQuery

Pandas

Matplotlib

Vega-Lite

Tableau

Jupyter Notebook

GitHub

Looker Studio

PROJECT EXPERIENCE

- Tableau project, using Superstore dataset – I have created an interactive dashboard which shows shipping speed, average delivery time, and performance by shipping type (Same Day, First Class, Second Class, Standard), enabling fast and intuitive decision-making.
- Looker Studio project using ad campaign data – dashboard calculates key KBIs (CPC, CPM, CTR, ROMI) and visualizes campaign performance, spend vs ROMI, and daily campaign activity to support continuation decisions.

EDUCATION

Bachelor's, Economics and Big Data

Kyiv School of
Economics,
2025 – present

Course, GoIT (Data Analyst on 30)

IT School
GoIT, 2025 -
present

Bachelor's, Software Engineering and
Business Analysis

Kyiv School of
Economics,
2023-2025

- Studied software engineering till the end of the second year, switched to economics and big data this year (joined second year).
